-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Information Disclosure Statement***

The information disclosure statement filed 16 August 2009 has been considered.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-8 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hatzinikolaou et al. in view of Shieh (United States Patent Number 3992262) and Kobayashi (United States Patent Number 3625826.)

Hatzinikolaou et al. teach a method of producing fungi using a medium comprising 57% molasses, corn steep liquor (CSL) and diammonium hydrogen phosphate at a temperature of 30 degrees Celsius. They do not teach the use of yeast, or specific concentrations of sucrose or liquor.

Shieh teaches the production of fungi at 30 degrees Celsius in a medium containing CSL, inorganic nitrogen and molasses.

Kobayashi teaches the use of yeast, CSL, sucrose, molasses and a culture temperature of 30 degrees Celsius for fungi production have been known in the art since at least 1971.

These references show in combination that the media components set forth in the claims are obvious optimizations of known effective media compositions and would have been *prima facie* obvious at the time the invention was made to a person of ordinary skill in the art. One would be motivated to optimize the media and protocol to produce the best results.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to WENDY C. HAAS whose telephone number is (571)272-0976. The examiner can normally be reached on Monday through Friday from 9:00 to 5:30.
